

Project Log

Task Allocation :

ZEWEN XUE:

Installation concept sketches, concept modelling, purchase materials, hand ant making, code servo and sound sensor section, soldering section, video clip.

TINGTING PENG:

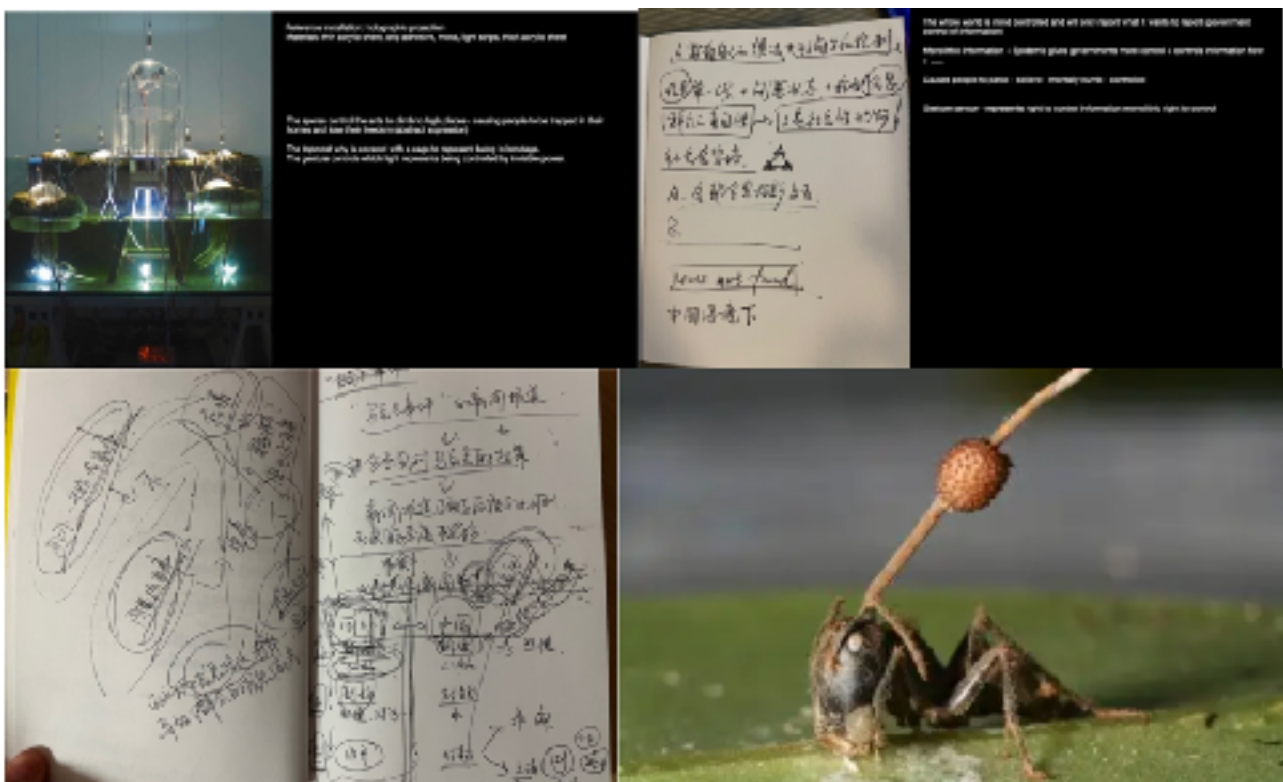

Idea, Logic text, purchase materials, project introduction, construction of the base of the device, code orientation sensor and audio section, soldering section;

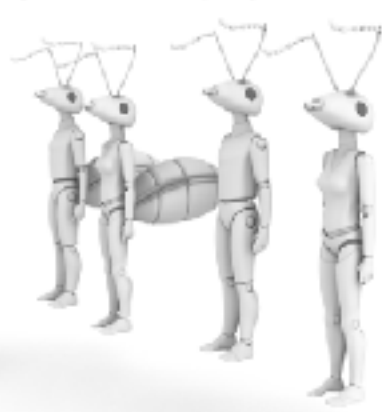

BO YIN:

Powerpoint Layout, installation base construction, code LED light section;

WEEK 1

Keywords: Concepts, discussions, Conducting thematic discussions, exploring initial options and sorting out the logic;

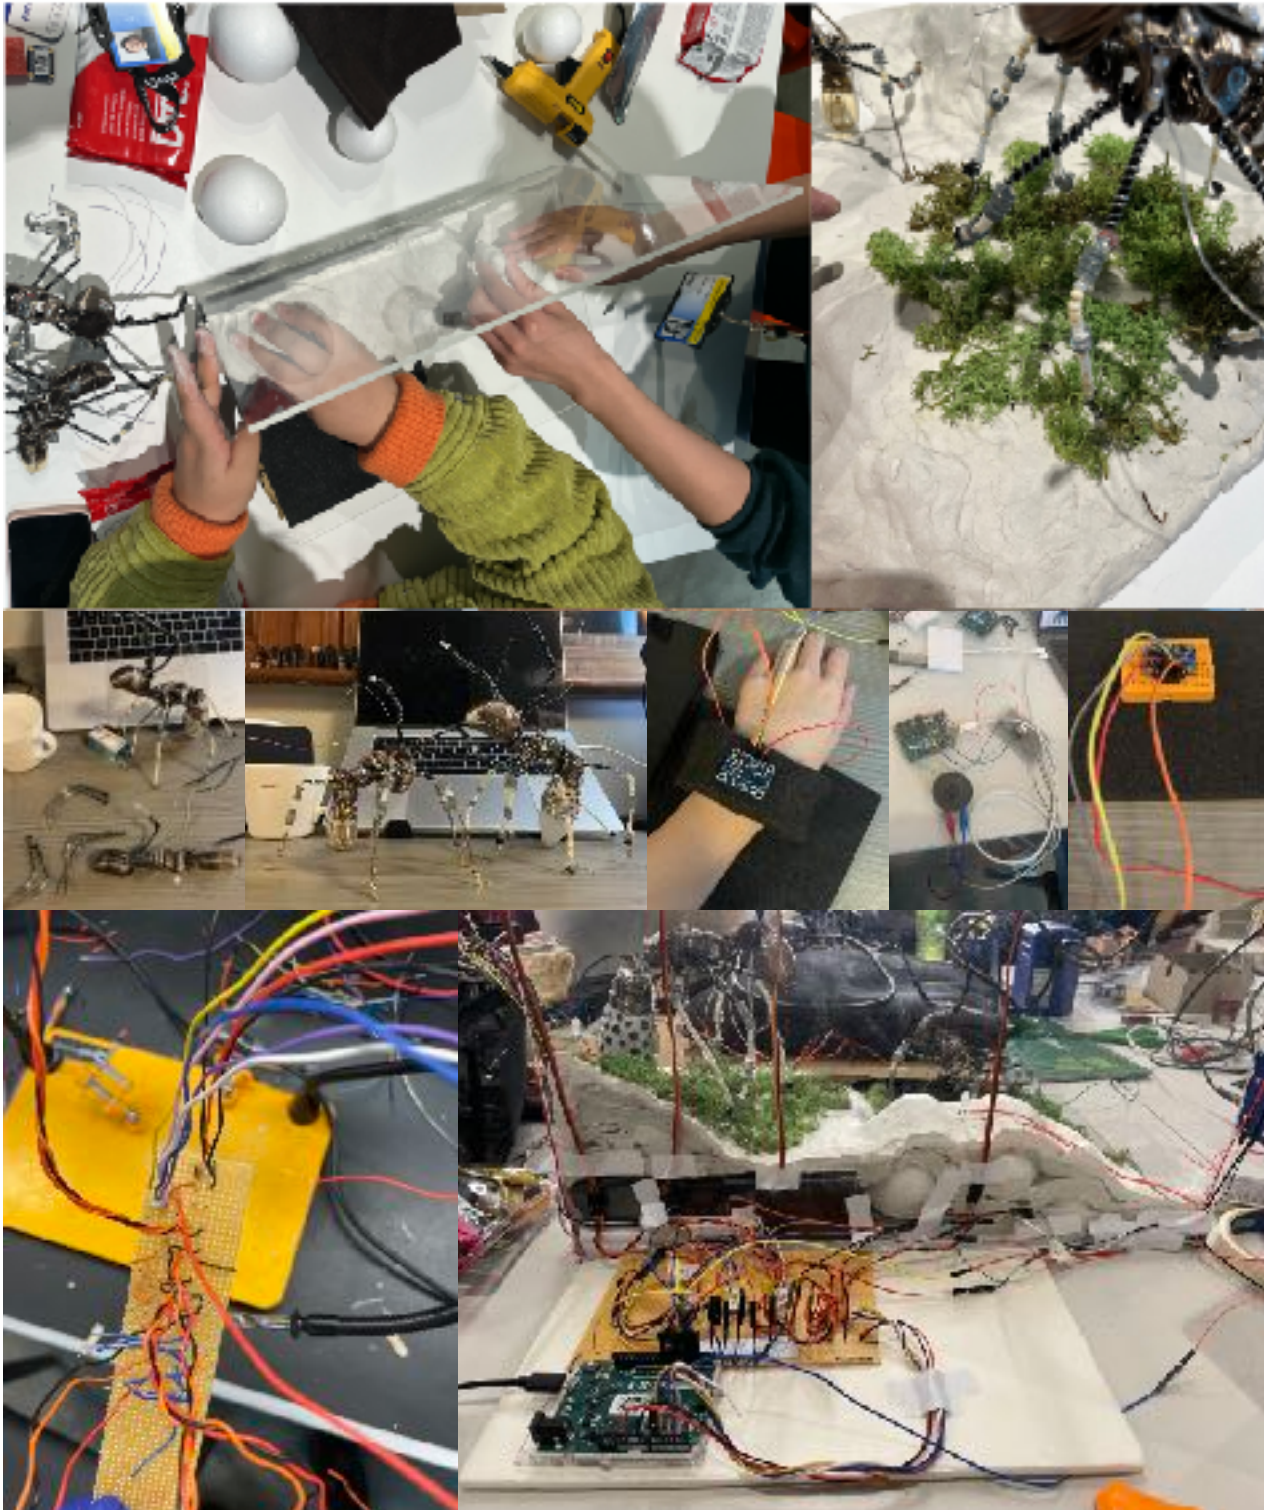

WEEK3

Keywords: Confirmation of project content, project brief, sketching of installations, drawing of circuit diagrams, purchase of project materials

WEEK4

Keywords: Build scenarios, Construction of installation content (enclosure), coding, sensors testing, PowerPoint

WEEK5

Keywords: Assembly of the unit, testing the operation of the unit, soldering of the circuit board, the connection of the unit and testing and adjustment, filming, completion of the PowerPoint, video editing, reporting
